Dear FCC,  
Please REJECT NAB's petition 04-160 to limit satellite radio services. I PAY for these services and find it appalling that the broadcasting association is trying to control who and what I listen to.

I am a traveling salesman that covers over 800,000 square miles in 4 states in 4 different time zones. Prior to XM Satellite Radio service, I was limited to "Local" stations which faded in and out when I traveled from city to city. Furthermore, local radio DID NOT provide me with traveling information from state to state or even county to county. XM radio covers this huge gap for people like me. I applaud them for providing a service like local traffic and weather as well as national traffic and weather when I find myself in a city which I am unfamiliar.

Please allow freedom of choice, which is the AMERICAN WAY!

Sincerely,

William E. Nehring  
Snohomish, WA.
